

Healthcare cleaning

The professional way

How to cut costs and defeat bacteria

Some say it's almost a 'mission impossible' to maintain maximum levels of hygiene and reduce the risks of hospital associated infections whilst keeping daily cleaning simple, effective and cost efficient.

We don't agree. We say it's definitely possible to improve hygiene levels and cleaning standards whilst keeping within budgets. With the Vileda Professional Swep one-step pre-prepared method and comprehensive on-site support packages, we can help you reach your goals – ultimate cleaning performance, the prevention of cross contamination and reduction of hospital associated infections.

Complete System

Vileda Professional Swep system is a complete one-step pre-prepared cleaning system tailor-made for hospital cleaning. Swep is the most complete and advanced microfiber cleaning system on the market and can be used not only for cleaning floors and stairs, but also for walls, ceilings and hard to reach places.

For maximum results the Swep system includes a range of other high performance cleaning products including the configurable Origo trolley range and 100% microfiber durable and disposable cloths including QuickStar micro and MicroRoll.

Maximum results

The combination of these innovative products, our expertise in the manufacture of microfiber systems, customised training programs and continuous support means you can be ensured of maximum results.

Why pre-preparation?

The pre-prepared method is exactly what it says – every mop and cloth required for that days' cleaning is centrally prepared in advance with the correct amount of water and chemical.

Pre-preparation and the mechanical action of the microfiber mops dramatically reduces the amount of chemicals required and leaves each mop damp enough to remove dirt without leaving the floor wet. Also, as the mops are pre-dosed they replace heavy buckets and the need for wringing mop heads.

After cleaning one room/area the mop is simply changed and another pre-prepared mop is placed on the frame for use in the next room/area. The soiled mop is then placed into a bag for laundering, so preventing cross contamination between rooms/areas.

Award Winning

Vileda Professional have won several international awards for for out-standing functionality and design. Swep Duo won the iF product design award and red dot product design award in 2006 and the Origo trolley system won the red dot product design award in 2008.

Innovation not imitation

Sweep is no newcomer. Vileda Professional has been developing and manufacturing cleaning systems for the healthcare market across Europe for over 25 years. Over this period our healthcare experts, in house production and R&D departments have ensured the Sweep system is always ahead of the market:

- Fifth generation of microfibre mops
- 1000 wash guarantee, including use with Hypoclorite
- Independent testing of mops and cloths proving upto 99.99% removal of bacteria (*Pseudomonas aeruginosa* and *Staphylococcus aureus*)
- Durable and disposable microfibre wiping solutions
- Choice of single or double sided mopping
- Fully customised trolley system developed for use with Sweep
- Dual action solution for effective cleaning of safety floors
- Full on site support and implementation program
- Tailor made training packages, experience of training over 3000 operatives on a site
- Colour Coding on all parts of the system

Interchangeable single or double sided mopping!

You now have the choice between the Sweep Classic single sided system or the new Sweep Duo double sided system. Sweep Duo features double-sided high performance mops which allow you to clean twice as far with one mop, perfect for larger patient rooms or corridors. Both the Classic and Duo systems are fully interchangeable with all Sweep equipment and Origo trolleys allowing you to create a tailor made cleaning solution.

Swep Classic Mops

The classic single sided mop solution.

MicroFinn

- Active fibre fringe traps all large dirt particles and hair
- Microfibre trailing edge gives outstanding cleaning performance and pick-up of the remaining dirt of the floor
- 1000 wash guarantee even when used with Hypochlorite
- Cut off RBGY colour coding tags

Swep Duo Mops

A new generation of double-sided mopping.

MicroCombi

- All the benefits of the classic MicroFinn but with the added advantage of double sided mopping

Swep Duo Safety Plus

- For effective cleaning of safety flooring
- One side for scrubbing, one side for dirt collection

Swep tools and accessories

The Swep system offers you the complete cleaning system with a range of microfibre products specifically developed to fulfil all your cleaning requirements including floors, walls, staircases and high/awkward to reach areas. These tools include the Duo-Duster, Duo Handmop, dosing sieves, prep-boxes, dustpans and dustpan sweepers.

Origo Trolleys

The Origo range of trolley systems for use with the SWEP Classic and Duo systems is much more than a method of transporting the mops.

Each trolley has storage for upto 40 pre-prepared mops (allowing cleaning of upto 1,600m²), pre-prepared and disposable microfibre wiping, waste collection and each of the system tools.

Microfillament Microfibre cloths

Traditional microfibre and ultra-microfibre cloths have a fibre thickness of less than 0.03dtex. Vileda Professional microfibre cloths utilise microfilaments with a fibre thickness of 0.015dtex.

QuickStar micro

Ideal for use with the pre-prepared wiping method and offers, fast high performance microfibre cleaning.

- Washable over 250 times
- 99.84% removal of bacteria

MicroRoll

The ultimate hygienic solution and the first disposable microfibre on the market that offers 100% microfibre performance at a throw away price.

- No concerns over spores surviving laundering
- 99.99% removal of bacteria

Much more than just products

Vileda Professional offer you much more than the products required to clean your healthcare environment to the highest standards. When you choose a Vileda Professional system you automatically gain over 25 years experience of cleaning healthcare environments across Europe.

One of our healthcare specialists will undertake a full assessment of your cleaning requirements, suggest the right products for you and offer a customised training and support package for effective implementation. Implementation isn't the end of the offering though, our ongoing after sales support and training gives you ongoing piece of mind.

Durable Microfibre cloths

- Machine Washable over 250 times
- 99.84% removal of bacteria
- Lightweight reduces washing costs

Assessment of your cleaning requirements site survey

Disposable Microfibre cloths

- No concerns over spores surviving laundering!
- 99.99% removal of bacteria • Low cost

Tailor made product range selection

Ongoing after sales support

Swept Classic

- 5th Generation Microfibre Mops
- 99.84% reduction in Bacteria
- 1000 wash guarantee with Hypochlorite

Customised on site training and support package

Swept Duo

- Double sided mops = twice the cleaning
- Fewer mops = lower costs
- Complete system = Solves all tasks
